

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

Resolved, That if the Committee on General Equalization, in considering the four different classes of property in the State of Illinois, viz: lands, town and city lots, railroad property, and personal property, do find any one class assessed lower, relatively, than any other class, said committee shall proceed to equalize between said classes, by adding to or deducting from the per cent. fixed by said committees, in each of the different counties, respectively, such per cent. as will, in their judgment, equalize the assessments between classes, and produce the proper aggregate result.

Mr. Divine offered the following as a substitute for the resolution of Mr. Curlee :

Resolved, That it is the duty of this Board, in exercising their proper functions, to consider each of the four classes of property separately and independently of any other class ; and upon such consideration to add to or deduct from the assessed value of each of said classes, in the several counties, such rate per centum as shall to them seem equitable and just, in order to produce a uniform valuation of the property of such class throughout the State—but that it is not competent or within the power of this Board to take from the aggregate value of one class and add to the aggregate value of another, throughout the State, in order to produce a supposed or an actual uniformity of value of such classes.

Resolved by the State Board of Equalization, now in session, That we tender to the afflicted ones our profoundest sympathy in their desolate condition.

Resolved, That it is the duty of the great State of Illinois to protect and aid its suffering children; and feeling that the Legislature thereof alone have the power to tender such material aid as is or may be necessary, we do therefore respectfully petition his excellency, the Governor, to issue a call for said body to meet at the earliest moment, and take such action and grant such aid as it is the duty of this State to grant.

Resolved, That as the assessment of Cook county was made at a time when all was prosperous, and said assessment has been presented to this Board, we feel that we have no power to grant such just relief therein as the exigencies of the case demand, and that such relief must be granted by a legislative enactment, if at all, we do therefore respectfully ask the Legislature to enact such laws as shall produce equity and relieve the unfortunate citizens of Chicago from being taxed upon the millions of property of which they have been so suddenly deprived.

On motion of Mr. Sleight,

The report was received and referred to the Committee on General Equalization.

Mr. Clapp, Chairman of the Committee on Equalization of Personal Property, presented the following report :

To the State Board of Equalisation :

Your Committee on Equalization of Personal Property would respectfully report, that in entering upon the duties assigned us, we first ascertained the rate per cent. of additions and subtractions of each county, in order to bring the several counties to the State average, and in doing so found a large deficit, amounting to \$3,971,004. In order to make up this large deficiency we proceeded to investigate the relative value of the Personal Property in each county, having reference to their locality, with regard to markets, railroads, quality of stock and other property subject to taxation, and made such deductions from or additions to the several counties as would do justice to all portions of the State, and at the same time raise the aggregate amount equal to the original assessment.

The tabular statement herewith presented represents the result of our labors, by which it will be seen the deficiency is made, and a small surplus amounting to less than one-fourth of one per cent.

All of which is respectfully submitted.

E. H. CLAPP, CHAIRMAN,
WM. FRIEND,
HOMER WILLMARTH,
ALPHA FORSYTH,

Committee on Equalization of Personal Property.

On motion of Mr. Petri,

The report was received and referred to the Committee on General Equalization.

Mr. Curlee, Chairman of the Committee on Equalization of Railroad Property, presented the following report :

To the State Board of Equalization:

Your Committee on Railroad Property, to whom was referred, for equalization, the Railroad Property of this State, ask leave to report that we have proceeded to the discharge of that duty by preparing a classification of the counties of the State, in which any of said railroad property is situated, based upon a classification of railroads, and have applied a graduated scale thereto that seems to us will produce a proper equality between counties, which we think entirely within the purview of law ; and have prepared a tabular statement (which is made part of of this report) showing the classification of counties, the average value per mile of main track and rolling stock, the average per mile adopted by committee, the total assessment of railroad property in each county, together with the rate per cent. and the several amounts to be added or deducted, and the equalized value of the railroad property in each county.

All of which is respectfully submitted.

On motion of Mr. Sleight,

The report was received and referred to the Committee on General Equalization.

Mr. Sleight presented the following report of the Committee on the Equalization of Town and City Lots :

To the State Board of Equalization:

The undersigned, your Committee to whom was referred the Equalization of Town and City Lots, would respectfully report as follows :

In the prosecution of our labors, we have found ourselves so hedged about with difficulties, arising from the want of information necessary to a full and just understanding of the merits and demerits of the different Towns and Cities, that we have proceeded in our investigations slowly, endeavoring to produce equality, and that alone.

We are fully aware that the conclusion arrived at by your Committee is not perfect, but believing it the nearest approach to equity that can be arrived at by your Committee, we present the following schedule attached hereto, and made a part of this report, and respectfully ask that the whole matter be referred to the Committee on General Equalization.

I. B. RANDLE, *Chairman.*
JOHN T. JENKINS,
H. O. SLEIGHT,
JAMES PIPER.

WHEREAS, The Supervisors of McHenry county, at their last session in September, A. Resolved, That to render strict justice to McHenry county, and prevent her from paying into the State Treasury \$1411 more than her proper share of State taxes, said county be placed in the class next lower than it naturally belongs.

TUESDAY, OCTOBER 24, 1871.

The Board met, pursuant to adjournment. Mr. Lippincott in the Chair.

Mr. Miles, Chairman of the Committee on General Equalization, submitted the following report:

To the State Board of Equalization:

Your Committee on General Equalization report:

That said Committee has duly considered the separate reports of the Committee on Equalization of Personal Property, the Committee on Equalization of Railroad Property, the Committee on Equalization of Lands, and the Committee on Equalization of Town and City Lots, referred to this Committee.

Your Committee has compiled table "B," herewith submitted as a part of this report, showing, by counties, the assessed value—the rates per cent. added and deducted, where such have been determined—and the equalized value for each class of property.

Your Committee has made some changes, as will be shown by reference to the reports of the respective Committees above named. The changes made were not intended to change the aggregate value of the different classes of property in a county, but to equalize the different classes of property in the same county.

Your Committee, acting under instructions from the Board to examine and consider whether either of the classes of property in the State were assessed, in the aggregate, at a relatively lower rate than the other classes of property in the State, and if so found, to determine what per centum should be added to said class or classes of property, determined that railroad property, as a class of property, was assessed relatively lower than any other class of property in the State, and added twenty-five per cent. to that class of property; and the aggregate so obtained was deducted, *pro rata*, from all the property of the State.

Your Committee also present the accompanying table "B," showing the rates per cent. added and deducted in each class of property in the several counties, and in the city of Quincy.

All of which is respectfully submitted,

R. W. MILES,

Chairman of the Committee on General Equalization.

"A."—TABLE OF PER CENTS accompanying and made part of the Report of the Committee on General Equalization.
